

Installation Instructions ATC-lab^{Advanced}

The University of Queensland

Selina Fothergill, Shayne Loft and Andrew Neal

July 2008

1. Download the pact0.0.3.installer.exe file and save it to your computer desktop.
2. Double click on this application. Read the license agreement - click I Agree.
3. Check that the box next to ATC-lab Experiment Presenter is checked and press Next.
4. Choose C:\program files\ATCLAB-Advanced\pact.0.0.3 (this is default).
5. Click Install
6. You will see that a folder called ATC-Scripts has been generated on your desktop.
7. In this folder you will find the practice trials and trial version. To run, simply drag and drop these xml files into 'pact' (the file act_lab-2006-05 must remain in the ATC-scripts folder)
8. To cancel the task at any time without saving data you can press CTRL&ALT&Delete. To exit the task and save data press CTRL&ALT&Q
9. To uninstall the program go to C drive and find the ATCLAB-Advanced folder. You will find an executable in that folder that will remove the program completely from your computer
10. Note that some people have reported that when installing ATC-lab they get an message something along the lines of "publisher cannot be verified are you sure you want to run software". Simply click yes to continue.
